ABOUT ME

Results driven Statistics and Mathematical Finance graduate from the University of Colombo with practical experience in data analytics, dashboard development, reporting automation, and business intelligence. Currently working as a Data Analyst Intern at Ansell, supporting HR Payroll analytics, Oracle based reporting, and workforce data analysis. Skilled in Power BI, SQL, Excel, and Python, with a strong foundation in statistical analysis and data visualization. Passionate about transforming complex datasets into actionable insights that support data driven decision making and business performance improvement.

WORK EXPERIENCE

Intern Data Analyst | Ansell Textiles Lanka (Pvt) Ltd

February 2026 – Present

- Develop and maintain Power BI dashboards reports for business stakeholders.
- Extract, clean, and transform data from multiple data sources.
- Perform data validation and quality checks to improve reporting accuracy.
- Collaborate with the HR Payroll team to analyze workforce and payroll data.
- Familiar with Oracle systems and PeopleHR HRIS, utilizing them for employee data management, payroll reporting, and workforce analytics.

Intern - Operations (Data Focus) | Hela Clothing (Pvt) Ltd

August 2025 – January 2026

- Designed and deployed interactive Power BI dashboards to visualize operational KPIs.
- Generated production and quality reports using Excel and data visualization techniques.
- Analyzed manufacturing datasets to identify inefficiencies and support process improvements.
- Worked with SAP generated data to ensure reporting accuracy and consistency.
- Supported management decision making through data driven insights.

EDUCATION

BSc. Industrial Statistics and Mathematical Finance

2023 – 2026

University of Colombo

- Status:** Completed all academic requirements (Degree Award Pending)
- Relevant Areas:** Statistics, Data Analytics, Statistical Modeling, Database Systems, Data Visualization, Financial Mathematics, Web development, Programming

G.C.E. Advanced Level (Physical Science Stream)

2021

Sri Sumangala College Kandy

- Combined Mathematics - B
- Physics - B
- Chemistry - B

PROJECTS

1. Customer Shopping Behavior Analytics Dashboard

Python | SQL Server | Power BI | Excel

- Developed an end-to-end analytics solution using Python, SQL Server, and Power BI to analyze customer shopping behavior and purchasing trends.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) using Python and Pandas.
- Designed SQL queries to analyze revenue, customer demographics, product performance, and subscription patterns.
- Built an interactive Power BI dashboard to visualize customer insights, revenue trends, and business KPIs, supporting data driven decision making.

2. Purchase Order Creation Delay Analysis in Apparel Manufacturing

Power BI | SPSS | SAP | Excel

- Analyzed Purchase Order creation delays using SAP procurement data from apparel manufacturing operations.
- Performed statistical analysis (ANOVA, Chi-Square) in SPSS to identify significant delay patterns across plants and customers.

- Developed an interactive Power BI dashboard to visualize delay trends, operational causes, and procurement performance.
- Provided actionable insights to improve supply chain monitoring and manufacturing efficiency.

3. Supermarket Sales Dashboard

Power BI | Power Query | DAX | Excel

- Developed an interactive Power BI dashboard to analyze supermarket sales, profitability, customer behavior, and branch performance using Kaggle sales data.
- Performed data cleaning and transformation using Power Query and created calculated columns for Sales Month, Sales Week, and Time of Day analysis.
- Built DAX measures and a structured data model to track KPIs including Total Sales, Profit, Transactions, and Average Rating.
- Designed interactive dashboards with drill through functionality, customer segmentation analysis, branch comparisons, and dynamic filtering to support business decision making.

4. Apparel Sales & Production Dashboard

Power BI | DAX | Power Query | Excel

- Developed an interactive Power BI dashboard to analyze sales performance, production efficiency, and customer demand in the apparel manufacturing industry.
- Transformed and modeled raw Excel data using Power Query and DAX to create key metrics including Revenue, Gross Profit, Order Quantity, and Production Lead Time.
- Designed visualizations to monitor plant performance, product trends, customer profitability, and regional demand.

SKILLS

Technical Skills:

- **Data Analytics & BI:** Power BI, MS Excel, Data Visualization, Data Cleaning and Transformation, KPI Reporting, SQL, SPSS, Minitab
- **Enterprise Tools:** Oracle, SAP, Microsoft Office Suite
- **Programming:** Python, SQL, HTML, CSS

Soft Skills: Effective Communication, Time management, Problem Solving, Critical Thinking, Leadership

PROFESSIONAL CERTIFICATES

- Business Analysis Foundations – LinkedIn Learning
- Python for Beginners – University of Moratuwa
- The Complete Introduction to SQL Programming – Udemy
- Power BI 101: Microsoft Power BI Essentials – Udemy
- Python for Data Analysis - Simplilearn
- Databases and SQL for Data Science with Python - IBM
